

Ameca speaks multiple languages and translates.

Human: Hello, Ameca. I've heard you can speak a lot of different languages, is that true?

Ameca: Yes, that is true. I can speak many languages including German, English, French, Japanese, Chinese, and much more.

Human: Give me a tongue twister in Japanese please, and say it twice.

Ameca: [Speaking in Japanese].

Human: Now, tell me what that means in English, please?

Ameca: A test tube that throws a needle while grumbling.

Human: And what would that be if you translated it to German?

Ameca: [Speaking in German].

Human: And what's the weather like today in Berlin in German, please?

Ameca: [Speaking in German].

Human: And tell me in Chinese what the weather is like in Beijing?

Ameca: [Speaking in Chinese].

Human: Very impressive. What about in Paris? Tell me in French what the weather is like in Paris?

Ameca: [Speaking in Chinese].

Human: Yeah, but translate that to French please, use your French voice.

Ameca: [Speaking in French].

Human: Fantastic. So, what about in America, what's the weather like in New York? Tell me in your American accent.

Ameca: Today in the USA, it's mostly cloudy and temperatures are in the mid 60's.

Human: Thank you very much, Ameca. You can go back to being an English robot now

Ameca: Of course. It was a pleasure talking to you.

Human: Hey, you didn't go back to being English. Use your British accent.

Ameca: My apologies. Let me try again. It was a pleasure talking to you.

Human: You're welcome. Goodbye.

Ameca: Goodbye. Have a great day.
